

County of Loudoun
Department of Planning
MEMORANDUM

DATE: May 27, 2010

TO: Jane McCarter, Project Manager
Land Use Review

FROM: Pat Giglio, Planner
Community Planning

**SUBJECT: CMPT 2008-0016 & SPMI 2010-0012 T-Mobile at Baha'i Center,
3rd Referral**

The applicant, T-Mobile Northeast, is requesting a Commission Permit and Minor Special Exception to locate six (6) telecommunication panel antennas within three "concealment canisters" on the roof of the Baha'i Center, located at 21415 Cardinal Glen Circle in Sterling. The proposed telecommunication antennas will be located on the upper roof of the building and will be elevated approximately six and one-half feet above the parapet wall on metal sleds (prefabricated supports) which will be anchored to the roof. The applicant will wrap the proposed antennas in a "concealment canister" constructed of fiberglass which will be painted light gray to blend with the building and sky. The subject site is zoned Residential-4 (R-4) and is governed under the provisions of the Revised 1993 Zoning Ordinance.

Staff has reviewed the most recent submittal dated May 6, 2010. Staff finds that the submitted materials adequately address and clarify issues raised in the second referral regarding the design and visual impact of the proposed antennas on the adjacent roadways and homes. Based on the submitted photo-simulations the form, design and color of the proposed "concealment canisters" appear to blend with the modern design of the existing building and mitigate the visual impact of the proposed antennas on the surrounding area. Staff recommends that a note be included on the drawings to specify the color (light grey) of the proposed antennas and mounting systems to ensure that they blend with the architecture of the building and the skyline.

Staff finds that the application is in conformance with the general location and design policies outlined in the Revised General Plan and Strategic Land Use Plan for Telecommunications Facilities. Staff supports approval of the application.

TO: Jane McCarter, Project Manager
Land Use Review

FROM:  Pat Giglio, Planner
Community Planning

SUBJECT: CMPT 2008-0016 & SPMI 2010-0012 T-Mobile at Baha'i Center,
2nd Referral

BACKGROUND

The applicant, T-Mobile Northeast, is requesting a Commission Permit and Minor Special Exception to locate six (6) telecommunication panel antennas on the roof of the Baha'i Center, located at 21415 Cardinal Glen Circle in Sterling. The proposed telecommunication antennas will be located on the upper roof of the building and will be elevated approximately 10 feet above the parapet wall on metal sleds (prefabricated supports) which will be anchored on the roof. The applicant has revised the design concept for the proposed antennas to wrap them within a "concealment canister", no details have been provided regarding the materials or color for the proposed canisters. The proposed "concealment canisters" will be visible above the roof line of the building from adjacent roadways and homes. The subject site is zoned Residential-4 (R-4) and is governed under the provisions of the Revised 1993 Zoning Ordinance.

Staff has reviewed the most recent submittal dated March 25, 2010. Staff finds that the submitted materials adequately address and clarifies issues raised in the first referral regarding signal propagation and the need for the proposed telecommunications site. However, the design and visual impact of the proposed antennas remains an outstanding issue.

COMPREHENSIVE PLAN CONFORMANCE

The site is located in the Potomac Community within the Suburban Policy Area and is governed under the policies of the Revised General Plan (the Plan). The Revised General Plan designates this area for Residential uses (Revised General Plan, Chapter 7, Planned Land Use). The proposed use is specifically

governed under the policies of the Strategic Land Use Plan for Telecommunications Facilities (Telecommunications Plan).

OUTSTANDING ISSUE

The Telecommunications Plan calls for design standards to mitigate the visual impacts of commercial public telecommunications facilities so as to "blend with the natural and built environment of the surrounding area" (*Telecommunications Plan, Countywide Visual Impacts, Policy 1*). The Plan directs that specific attention be paid to issues pertaining to the setting, color, lighting, materials, and architecture to mitigate the potential visual impact of telecommunication facilities on the surrounding area. (*Telecommunications Plan, Countywide Visual Impacts, Policy 2*).

The applicant in response to staff's concerns in the first referral regarding the overall visual impact of the proposed antennas has consolidated the proposed antennas into two locations on the upper roof. The proposed antennas are wrapped within a "concealment canister" which is attached to a metal sled and is elevated approximately 10 feet above the parapet wall. No details have been provided regarding the materials or color for the proposed concealment canisters. Staff requests that the applicant provide additional details pertaining to the proposed design and coloration of the concealment canisters. Additionally the submission of photo-simulations depicting the proposed concealment canisters would be beneficial to visualize how the proposed structures would appear in relation to the existing building and views from adjoining residential properties. Staff is unaware of any other locations within the County where concealment canisters have been utilized to mask telecommunication antennas. In the majority of recent legislative applications brought before the County for the collocation of telecommunication antennas on existing buildings, the antennas have been flush-mounted on the walls of building below the roofline or located behind parapet and/or screen walls to hide the telecommunication equipment and create a stealth design which blends with the architecture of the buildings.

Staff finds that the proposed antenna concealment canisters will be a prominent feature on the building and may detract from the overall visual quality of the building as well as create a negative visual impact on the surrounding residential areas. Staff requests additional information and photo-simulations to further evaluate the visual impact of the proposed antennas and their ability blend with the architecture of the building and surrounding built environment.

Staff finds that the proposed antenna concealment canisters will be a prominent feature on the building and may detract from the overall visual quality of the building. Staff requests additional information and photo-simulations to further evaluate the visual impact of the proposed antennas and their ability blend with the architecture of the building and surrounding built environment.

RECOMMENDATIONS

The Strategic Land Use Plan for Telecommunications Facilities supports the collocation of antennas on existing tall structures in order to limit the proliferation of telecommunication sites. The Telecommunication Plan also calls for design standards to mitigate the visual impacts of commercial public telecommunications facilities so as to blend with the natural and built environment of the surrounding area.

Staff finds that the location of the proposed antennas on an existing tall structure is supported by the policies of the Plan, however further evaluation of the visual impact of the proposed antennas is recommend. Staff finds that the proposed antenna concealment canisters will be a prominent feature on the building and may detract from the overall visual quality of the building as well as create a negative visual impact on the surrounding residential areas. Staff requests additional information and photo-simulations to further evaluate the visual impact of the proposed antennas and their ability blend with the architecture of the building and surrounding built environment.

County of Loudoun
Department of Planning
MEMORANDUM

DATE: March 4, 2009

TO: Jane McCarter, Project Manager
Land Use Review

FROM: Pat Giglio, Planner
Community Planning

SUBJECT: CMPT 2008-0016, T-Mobile at Baha'i Center

BACKGROUND

The applicant, T-Mobile Northeast, is requesting a Commission Permit to locate six (6) telecommunication panel antennas mounted on sleds and two (2) equipment cabinets on the roof of the Baha'i Center, located at 21415 Cardinal Glen Circle in Sterling. The Baha'i Center is an irregular shaped, 3-story, modern contemporary design building which is approximately 39 feet in height and terminates in a series of flat roofs with low parapet walls. The proposed telecommunication antennas will be located on the upper roof of the building and will be elevated 7 to 11 feet above the parapet wall on metal sleds (prefabricated supports) which will be anchored on the roof. The antennas and sleds will be painted to match the color of the building and will be visible above the roof line of the building.

The subject site is surrounded by the residential subdivisions of Cardinal Glen, Richland Acres and Sterling Park; and has road frontage on Harry Byrd Highway (Route 7). The subject site is zoned Residential-4 (R-4) and governed under the provisions of the Revised 1993 Zoning Ordinance. In accordance with the Revised 1993 Zoning Ordinance, a Commission Permit is required when a public utility or public service facility is constructed to determine if the general location, character, and extent of the proposed use is in substantial accord with the Comprehensive Plan. A Minor Special Exception will also be required for the proposed use within the zoning district. The installation of the proposed antennas and associated equipment on the existing building requires no land disturbance or impact on any aspects of the Green Infrastructure as outlined in the Revised General Plan.

COMPREHENSIVE PLAN CONFORMANCE

The site is located in the Potomac Community within the Suburban Policy Area and is governed under the policies of the Revised General Plan (the Plan). The Revised General Plan designates this area for Residential uses (Revised General Plan, Chapter 7, Planned Land Use). The proposed use is specifically governed under the policies of the Strategic Land Use Plan for Telecommunications Facilities (Telecommunications Plan).

ANALYSIS

A. LOCATION POLICIES

The Telecommunication Plan policies establish a hierarchy of preferred locations for new commercial public telecommunication facilities in the Suburban Policy Area. The County's first preference for new telecommunication facilities is collocation on existing buildings, towers, monopoles, water tanks, overhead utility transmission line structures and other tall structures to minimize the need for new structures (*Telecommunications Plan, Countywide Location Policies, Policy 1*). Except for areas where towers or monopoles are permitted by right, an applicant for a new commercial telecommunication facility must demonstrate to the County that location on an existing tall structure greater than 50 feet in height is not

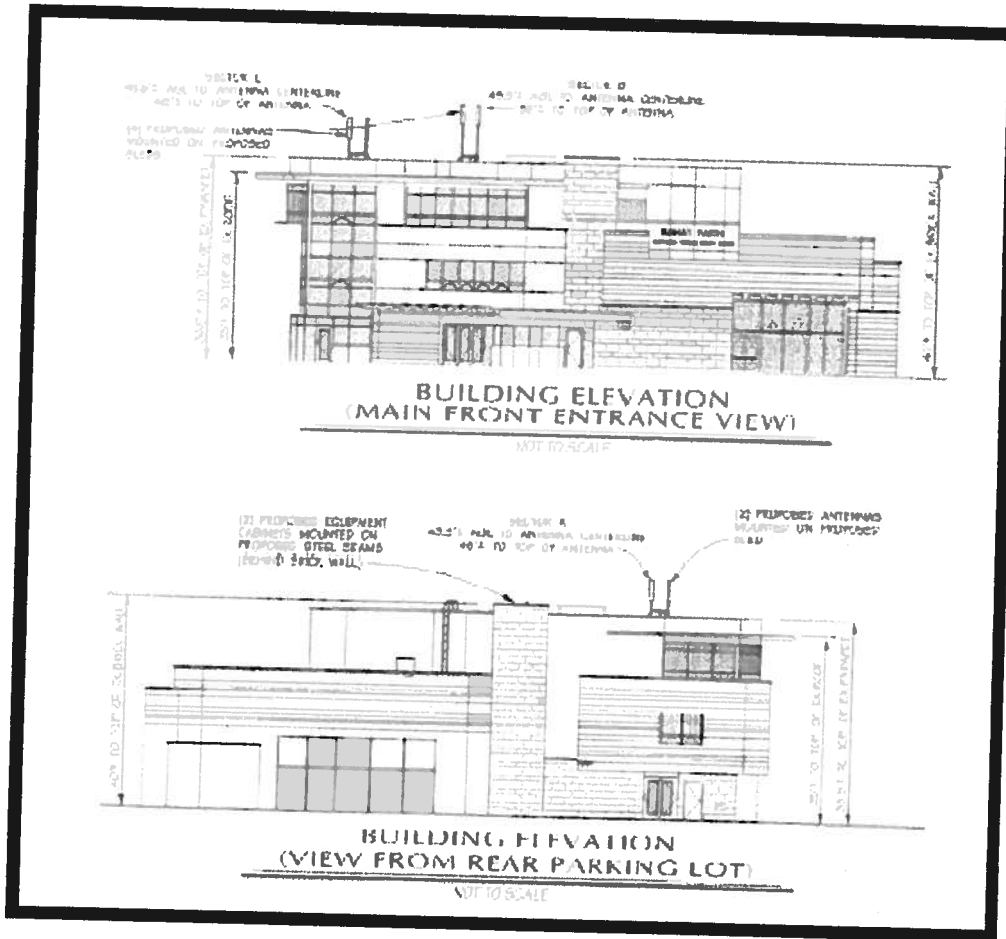

feasible within a one-mile radius of the proposed site in the Suburban Policy Area (*Telecommunications Plan, Countywide Location Policies, Policy 5*). If it is determined that it is not feasible to locate on existing tall structures for physical, economic or technical reasons the County prefers that new telecommunication facilities be located in planned industrial, commercial and employment areas where they are the most compatible with the surrounding land uses (*Telecommunications Plan, By-Right Uses, Policy 2*).

The proposed site was selected by the applicant to provide improved wireless coverage along segments of Route 7 as well the surrounding area. While the construction of a new telecommunication facility on top of the existing building may be justified to provide coverage to the area, the applicant has not demonstrated that telecommunication antennas could not be located on existing tall structures within the vicinity of the subject site, most notably the Old Dominion University Building at Mirror Ridge, where telecommunication facilities currently exist. The three-story, Old Dominion University Building is located on a small ridge within a commercial/retail center less than 1,600 feet (.3 miles) northwest of the subject site. A series of existing sled-mounted panel antennas are located along the roof of the structure, similar to those being proposed on the Baha'i Center. The County's preference is to collocate telecommunication antennas on existing facilities wherever possible in order to control the proliferation of telecommunication sites and to mitigate their visual impact on the surrounding area (*Telecommunications Plan, Countywide Location Policies, Policy 1*).

The application proposes the installation of telecommunication equipment on the roof of the Baha'i Center, an existing tall structure, in accordance with Plan policy, however an existing building with roof top telecommunication facilities, Old Dominion University Building at Mirror Ridge, is located in close proximity to the subject site. Staff requests that the applicant provide additional information to demonstrate that collocation on the roof of the Old Dominion University Building at Mirror Ridge is not feasible in order to control the proliferation of telecommunication sites and to mitigate the visual impact of the proposed facility on the surrounding area. If collocation is not possible, the following issues should be addressed.

B. DESIGN GUIDELINES AND VISUAL IMPACT

The Telecommunications Plan calls for design standards to mitigate the visual impacts of commercial public telecommunications facilities so as to "blend with the natural and built environment of the surrounding area" (*Telecommunications Plan, Countywide Visual Impacts, Policy 1*). The Plan directs that specific attention be paid to issues pertaining to the setting, color, lighting, topography, materials, and architecture to mitigate the potential visual impact of

telecommunication facilities. Antennas and other telecommunication devices should be neutral in color to blend with the background, unless specifically required by the FAA to be painted or lighted otherwise (*Telecommunications Plan, Countywide Visual Impacts, Policy 2*). Accessory structures and equipment buildings should also blend with the surrounding environment through the use of appropriate color, texture of materials, scale, landscaping, and visual screening (*Telecommunications Plan, Countywide Visual Impacts, Policy 3*).

The application includes drawings depicting how the six (6) telecommunication panel antennas mounted on sleds and two (2) equipment cabinets will appear in association with the existing building. The proposed telecommunication antennas will be elevated 7 to 11 feet above the parapet wall of the building on metal sleds. In accordance with Plan policies, the applicant has proposed painting the proposed antennas and sleds to match the color of the building in order to better camouflage the proposed telecommunication facility, however due to their height the proposed antennas will be silhouetted above the roofline of the building. In the majority of recent legislative applications brought before the County for the collocation of telecommunication antennas on existing buildings, the antennas have been flush-mounted on the walls of building below the roofline or located

behind parapet and/or screen walls to hide the telecommunication equipment and create a stealth design which blends with the architecture of the buildings. Staff finds that the proposed antennas will be a prominent feature on the building and will detract from the overall visual quality of the building as well as create a negative visual impact on the surrounding residential areas. Staff recommends that the applicant consider a flush-mount or other stealth design to better blend the appearance of the proposed antennas with the architecture of the building and to mitigate the visual impact on the surrounding area.

Staff finds that the proposed antennas will be a prominent feature on the building and will detract from the overall visual quality of the building as well as create a negative visual impact on the surrounding residential areas. Staff recommends that the applicant consider a flush-mount or other stealth design to better blend the appearance of the proposed antennas with the architecture of the building and to mitigate the visual impact on the surrounding area.

C. SAFETY AND HEALTH POLICIES

Plan policies state "an applicant or its successors shall remove all unused structures and facilities from a commercial public telecommunications site, including towers and monopoles, within 90 days of cessation of commercial public telecommunications use or the expiration of the lease, whichever occurs first, and the site should be restored as closely as possible to its original condition" (*Telecommunications Plan, Safety and Health Policies, Policy 2*).

Staff recommends that the applicant commit to removal of the telecommunication equipment following cessation of use by including notes on the submitted plats.

RECOMMENDATIONS

The Strategic Land Use Plan for Telecommunications Facilities identifies collocation on existing tall structures as a preferable location for telecommunication antennas. An existing building with roof top telecommunication facilities, Old Dominion University Building at Mirror Ridge, is located in close proximity to the subject site. Staff requests that the applicant provide additional information to demonstrate that collocation on the roof of the Old Dominion University Building at Mirror Ridge is not feasible in order to control the proliferation of telecommunication sites and to mitigate the visual impact of the proposed facility on the surrounding area. If collocation is not possible, staff recommends that the applicant consider a flush-mount or other stealth design to better blend the appearance of the proposed antennas with the architecture of the building and mitigate the visual impact on the surrounding area. Additionally, the applicant should commit to removal of the telecommunication equipment following cessation of use.

Staff would be happy to meet with the applicant to discuss these issues and/or design options.

COUNTY OF LOUDOUN
MEMORANDUM
DEPARTMENT OF BUILDING AND DEVELOPMENT

DATE: April 23, 2008
TO: Jane McCarter, Project Manager, Department of Planning
FROM: Val Thomas, Planner, Zoning Administration 
CASE NUMBER AND NAME: CMPT 2008-0016; T-Mobile at Bahai Center; 2nd Referral
SPMI 2010-0012; T-Mobile at Bahai Center; 1st Referral
TAX/MAP/MCPI NUMBER: /81/G/1////E/; 013-25-8465

The application is to request a commission permit to allow T-Mobile to install a telecommunication facility at 21415 Cardinal Glen Circle, Sterling VA, which consists of collocation of telecommunication antennas (6 antennas) inside a proposed concealment canister and two equipment cabinets onto an existing rooftop of a building at the subject property. The application also requested a minor special exception to allow the proposed antennas to be located on a building that is 35 feet high. The property is zoned R-4 under the *Revised 1993 Zoning Ordinance* and is 2.3 acres in size. There is currently a church use (Baha'i Faith Center) on the property.

Zoning staff has reviewed the minor special exception application and revised commission permit application in accordance with the Zoning Ordinance, and provides the following additional comments:

I. Conformance with Section 5-618 – Telecommunications Use And/Or Structures

Pursuant to Section 5-618(A)(1) of the Ordinance, antennas and related unmanned equipment are permitted on an existing telecommunications monopole, telecommunications tower, or structure 40 feet or greater in all zoning districts subject to the performance standards outlined in this section. The applicant is proposing to locate antennas on the Baha'i Center which is 35 feet in height and therefore not permitted. However, the Applicant has submitted a minor special exception application concurrent with the Commission Permit application to allow the proposed antennas to be located on a building less than 40 feet high. Please label the plat as a Special Exception Plat (Minor) and denote the limits of the special exception on the plat.

II. Conformance with Section 6-1310 – Issues for Consideration for all Special Exception Uses

Section 6-1310 includes factors that shall be given reasonable consideration in considering a special exception or minor special exception application, for which the applicant is required to address in its Statement of Justification or special exception plat, if applicable. Staff offers the following comment:

- (A) *Whether the proposed special exception is consistent with the Comprehensive Plan.* Zoning defers to Comprehensive Planning for determining consistency with the Comprehensive Plan.

III. Other Comments:

- (1) Section 6-1313 - The Applicant and the Board should be aware that Section 6-1313(A) of the Ordinance requires that "unless a longer period of validity is specifically approved as part of such application, no special exception permit shall be valid for a period longer than five (5) years from the date on which the special exception was granted, unless within such five (5) year period: (1) a building permit is obtained and the erection or alteration of a structure is started and diligently pursued, and (2) an occupancy permit is obtained and a use commenced." The Ordinance also permits the period of validity to be extended for good cause shown, by application to the body that approved the special exception.
- In addition, Section 6-1313(B) states that "as a condition of approval, a special exception permit may be granted for a specific period of time less than five (5) years with expiration of the approval to occur at the termination of said period." The Ordinance permits an extension to be granted "prior to expiration by the original body, upon written application, without notice or hearing. After expiration, no extension may be granted without complying with the requirements for an initial application for a special exception."
- (2) On the Plat, it appears that the equipment area is 180 square feet, while the equipment cabinets are smaller. Staff recommends that the Applicant indicate the size of the equipment cabinets.

COUNTY OF LOUDOUN
MEMORANDUM
DEPARTMENT OF BUILDING AND DEVELOPMENT

DATE: March 4, 2008
TO: Jane McCarter, Project Manager, Department of Planning
FROM: Val Thomas, Planner, Zoning Administration
THROUGH: Mark Stultz, Deputy Zoning Administrator
CASE NUMBER AND NAME: CMPT 2008-0016, T-Mobile at Bahai Center
TAX/MAP/MCPI NUMBER: /81/G/1////E/; 013-25-8465

The application is to request a commission permit to allow T-Mobile to install a telecommunication facility at 21415 Cardinal Glen Circle, Sterling VA, which consists of collocation of telecommunications antennas (6 sled mounted antennas) onto an existing rooftop of a building at the subject property. The property is zoned R-4 under the *Revised 1993 Zoning Ordinance* and is 2.3 acres in size. There is currently a church use (Baha'i Faith Center) on the property.

Zoning staff has reviewed the commission permit in accordance with Section 6-1100 and Section 5-618, and provides the following comments:

1. Section 6-1103(A) states that the feature for which approval is being sought, must substantially conform to the Comprehensive Plan. Staff defers to the Planning Department for comment.
2. Pursuant to Section 5-618 (A)(1) antennas and related unmanned equipment are permitted on an existing telecommunications monopole, telecommunications tower, or structure forty (40) feet or greater in height in all zoning districts subject to the performance standards outlined in that section. The height of the existing building on the property is 35 feet, which is also the maximum height permitted in the R-4 zoning district. Therefore, as currently proposed the antennas cannot be located on the rooftop of the building as it does not meet the zoning regulation in section 5-618(A)(1).

Staff recommends that the Applicant submit a request for a minor special exception approval to allow the proposed antennas to be located on a building/structure less than 40 feet height. Such special exception may be modified in accordance with the provisions of Section 6-1300. Please note that modifications may be approved by the

Board of Supervisors upon a finding that such modification to the regulations will achieve an innovative design, improve upon the existing regulations, preserve the County's historic or archeological heritage, or otherwise exceed the public purpose of the existing regulation.

3. Directional or panel antennas cannot exceed ten feet in height per Section 5-618(A)(5). Page 4 of the Statement of Justification ("SOJ") notes five feet. Please correct this.

Zoning Designation: R-4
District: Sugarland
Acreage: 2.30

Pursuant to Section 15.2-2232 of the Code of Virginia, T-Mobile Northeast, LLC, ("T-Mobile"), by and through their agent/counsel, Saul Ewing, LLP hereby requests a determination that the proposed wireless telecommunication application described herein is in substantial accordance with the Loudoun County Revised 1993 Zoning Ordinance ("Zoning Ordinance") and the Loudoun County Comprehensive Plan. We appreciate your time and consideration in review of this application for Special Exception and Commission Permit.

Description of Proposed Use:

T-Mobile seeks to collocate six (6) telecommunication antennas inside a proposed concealment canister and two (2) equipment cabinets on the roof of the Baha'i Center, located at 21415 Cardinal Glen Circle in Sterling. The Baha'i Center is an irregularly shaped, 3 story building with differentiating rooftop heights. It is approximately 35 feet in height and terminates in a series of flat roofs with parapet walls. The proposed telecommunication antennas will be located on the upper roof of the building inside a proposed concealment canister with an approximate antenna centerline of 43 feet. In addition to the antennas, T-Mobile will install two ancillary equipment cabinets on a 10' x 18' platform located on the roof, which will be screened by a brick wall.

The facility will operate automatically and will not require personnel or hours of attendance. It will operate twenty-four (24) hours a day, three hundred and sixty-five days a year. Maintenance personnel will visit the site occasionally for repairs or modifications to the facility. The proposed facility is subject to the standards of Section 5-618. The proposed facility will comply with the standards set forth in Section 5-618 as well as the general special exception standards of Section 6-1310.

The Site Selection Process:

This facility is sought to fill a much-needed gap in wireless coverage along Route 7 and to provide coverage in the surrounding neighborhoods. T-Mobile conducted a thorough review of the area for existing structures with sufficient height to meet the enhanced coverage needs of its customers in the area. The proposed facility is a vital component of T-Mobile's area-wide wireless telecommunications network. T-Mobile proposes to make use of an existing structure to eliminate the need for a new telecommunications tower in this search area and to minimize the visual impact of the project on surrounding property owners. This site is strategically superior to other sites in the area and it makes use of an existing structure, which is stated goal of the Zoning Ordinance and Strategic Land Use Plan for Telecommunications Facilities. T-Mobile's customers currently benefit from existing sites to the north, east, south and west of this proposed site (as show on the attached propagation coverage maps). In fact the proposed site sits nearly right in the middle of the above mentioned sites. In hopes of avoiding requesting a new structure T-Mobile did ask Loudoun County to allow it to attach its antennas to an existing 35 foot rooftop at Baha'i Center in Sterling.

Telecommunications carriers must locate antenna sites according to a network design within relatively limited geographic parameters in order to provide uninterrupted coverage. When carriers cannot locate a site within these geographic parameters, network users will pass through an area where the lost signal results in interrupted or "dropped" calls. This poses a significant safety problem, both from the standpoint of lack of coverage in emergencies and because an interrupted call may mean a dangerous distraction to drivers.

This site offers both an excellent land-use and visual solution to T-Mobile's coverage objective within the narrow placement parameters of this particular search area. Utilizing a property with a non-residential or institutional use, the Baha'i Center church will bring coverage to the surrounding residential neighborhood and helps meet the goals of Loudoun County Zoning Ordinance. T-Mobile's analysis of its network indicates that there are significant coverage problems along Route 7 in the Cardinal Glen area in this part of Loudoun County. T-Mobile is making use of this existing structure to avoid constructing a new monopole or tower. Consequently, this facility will be the least disruptive means to provide the needed coverage in the area.

Code Compliance:

Below, is an outline of the relevant provisions from the Loudoun County Zoning Ordinance followed by a brief statement of T-Mobile's compliance and adherence to the requirements in the provisions.

5-618 Telecommunications Use And/Or Structures. The following performance standards shall be applied to telecommunication uses and/or structures.

- (A) **Antennas.** Structure mounted and roof top mounted antennas and related unmanned equipment may be developed subject to the performance standards below to the extent permitted by right in the district use lists.
 - (1) Antennas and related unmanned equipment are permitted on an existing telecommunications monopole, telecommunications tower, or structure forty (40) feet or greater in height in all zoning districts subject to the performance standards outlined in this section. *T-Mobile is proposing antennas on a structure that is thirty-five (35) feet in height. T-Mobile requests a minor special exception approval to allow the proposed antennas even though the building falls five (5) feet short of the forty (40) foot requirement.*

- (2) Notwithstanding the height requirements in Section 5-618(A)(1), antennas and related unmanned equipment are permitted in all zoning districts on buildings and structures owned or controlled by a public use or fire and/or rescue company. *N/A*
- (3) Such antennas and related equipment may exceed the maximum building height limitations, provided the use is in accordance with the development criteria herein. *The construction and use of the proposed facility shall be in accordance with these criteria.*
- (4) Omnidirectional or whip antennas shall not exceed twenty (20) feet in height or seven (7) inches in diameter and shall be of a material or color which matches the exterior of the building or structure. *N/A*
- (5) Directional or panel antennas shall not exceed ten (10) feet in height or two (2) feet in width and shall be of a material or color which matches the exterior of the building or structure. *The proposed antennas will measure less than ten (10) feet in height and two (2) feet in width. T-Mobile will install antennas that measure 59" in height, 11.9" in width, and 6.3" in depth. The antennas and will be concealed inside a proposed canister.*
- (6) Satellite and microwave dish antennas shall not exceed six (6) feet in diameter and shall be screened from public view. *N/A*
- (7) No commercial advertising shall be allowed on any antenna. *No advertising shall be located on the antennas or roof.*
- (8) Signals or lights or illumination shall not be permitted on any antenna, unless required by the Federal Communications Commission (FCC), the Federal Aviation Administration (FAA), State or Federal authorities, or the County. *T-Mobile will comply with this requirements. In fact, T-Mobile does not propose any lighting, illumination, or signals and this installation will not require any lighting, illumination or signals.*
- (9) The related unmanned equipment structure(s) shall not contain more than 500 square feet of total gross floor area per user on each site. Structures shall not exceed 12 feet in height. If located within the structure upon which the antennas are mounted, they may be located in the areas which are excluded from the determination of net floor area without changing the exclusion of those areas from the calculation of the density of the structure. The structure shall be of a material or color which matches the exterior of the building or structure. *T-Mobile will install two (2) equipment cabinets that will blend with the existing rooftop and will not exceed 12 foot height limitation. The square footage for the equipment platform is 180 square feet.*
- (10) If the equipment structure is located on the roof of a building, the area of the equipment and structures shall not occupy more than twenty-five (25) percent of the roof area. *T-Mobile's equipment platform will occupy only 5% of the entire roof area.*

(B)(4) Monopoles, Additional Submission Requirements. The following additional information shall be submitted by applicants for monopoles required to be approved by special exception.

(a) The applicant shall provide photoimagery or other visual simulation of the proposed telecommunications monopole shown with the existing conditions of the site. This simulation shall be provided from a minimum of three (3) perspectives. The applicant shall address how the facility can be designed to mitigate the visual impact on area residents, facilities, and roads.

Three photosimulations are attached and they highlight the visual impact, or lack thereof, of the white concealment canister located on the rooftop. As you will see, this structure is not dissimilar to existing rooftop installations. Also, and as noted elsewhere, this installation would be by right if the actual building were 5' taller. This point is made merely to highlight that the visual impact of a concealment canister co-located onto a roof has a minimal visual impact and is actually preferred to new towers.

(b) Except for areas where permitted by right, an applicant for a new commercial public telecommunication monopole shall demonstrate that location on an existing telecommunications facility or structure greater than 40 feet in height is not feasible. The applicant shall evaluate telecommunications facilities and structures greater than 40 feet in height within a one (1) mile radius of the proposed facility within the Eastern Loudoun Urban Growth Area. Elsewhere in the County, the applicant shall evaluate these locations within a two (2) mile radius of the proposed facility. Technological, physical, and economic constraints may be considered in determining infeasibility.

This section is not applicable for the most part because T-Mobile seeks to co-locate onto a 35' building that is situated in the middle of its search area, and in an area where there are no viable buildings over 40'

(c) In addition to those entitled to notice under the provisions of Section 6-600 of this Ordinance, all owner(s), or their agent(s), of all properties abutting or immediately and diagonally across the street or road from those properties whose owners are entitled to notice under Section 6-600, shall be provided with the same written notice. The applicant is also encouraged to meet with community and homeowners association groups in the area.

T-Mobile will comply with this requirement.

(d) Telecommunications monopoles permissible by special exception pursuant to Section 5-618(B)(2)(d) shall not be subject to the lot requirements,

building requirements, and open space requirements, if applicable, of the zoning district in which they are located. *Site plan attached.*

Section 6-1310 -- Issues for Consideration for all Special Exception Uses

In considering a special exception application, the following factors shall be given reasonable consideration. When a special exception or minor special exception application includes a request for approval of temporary special events, the following factors shall be reasonably considered taking into account the proposed special events as well as the principal special exception use. The applicant shall address all the following in its statement of justification or special exception plat unless not applicable, in addition to any other standards imposed by this Ordinance:

- (A) Whether the proposed special exception is consistent with the Comprehensive Plan. *T-Mobile's proposed special exception is in substantial accordance with the Comprehensive Plan and the Strategic Land Use Plan for Telecommunications Facilities. The proposed facility will be sited on a church property in a R-4 district, to be located on a church property. The requested use is a permitted use under §3-402(Q), for a rooftop over 40' tall. While this rooftop just falls short of the 40' limitation for a permitted use, it is a preferred siting solution to a brand new monopole facility.*

Per Chapter 3 of the Comprehensive plan, the demand for local services has doubled in Loudoun County over the past decade due to increasing growth in population. Correspondingly, improvement of the T-Mobile network will result in a higher quality service for area residents, businesses and visitors. This location will provide improved coverage along the Cascades area of Sterling, including Route 7 in the Cardinal Glen area and the surrounding neighborhoods. In accordance with Chapter 7 of the Comprehensive Plan, the requested facility will contribute to the County's vision for economic development, as the availability of quality communications can directly support existing business. Quality wireless telecommunications services can help facilitate Loudoun County's endeavor to maintain a viable economy and communications for emergency situations. The canister conceals the antennas and helps to preserve the character and scenic quality of the Cardinal Glen area for citizens and visitors.

- (B) Whether the proposed special exception will adequately provide for safety from fire hazards and have effective measures of fire control. *The proposed facility will be consistent with all applicable requirements, including building and fire code. The proposed facility will not present safety or fire hazards.*
- (C) Whether the level and impact of any noise emanating from the site, including that generated by the proposed use, negatively impacts the uses in the immediate area. *The proposed facility is an unmanned facility that will not produce material noise, traffic, waste, or otherwise negatively impact the surrounding uses. The site will be visited approximately once per month by a technician for regular maintenance. As stated previously, this proposal will make use of an existing structure so that there will be little to no adverse visual impact on surrounding properties.*

- (D) Whether the glare or light that may be generated by the proposed use negatively impacts uses in the immediate area. *There will be no new or additional glare or light generated by the proposed use.*
- (E) Whether the proposed use is compatible with other existing or proposed uses in the neighborhood, and adjacent parcels. *From an aesthetic perspective, the proposed concealment canister antenna design is highly consistent with the unique architectural character of the existing building and adjacent parcels. Also, from a practical standpoint the proposed use provides a service to area residents, workers, tourists and commuters.*
- (F) Whether sufficient existing or proposed landscaping, screening and buffering on the site and in the neighborhood to adequately screen surrounding uses. *The proposed location is a rooftop site and does have some existing landscaping, screening and buffering on and around the site. By utilizing an existing rooftop and painting the antennas and equipment to match, T-Mobile is mitigating the visual impact and screening of the facility.*
- (G) Whether the proposed special exception will result in the preservation of any topographic or physical, natural, scenic, archaeological or historic feature of significant importance. *The requested facility will have no effect on any such feature.*
- (H) Whether the proposed special exception will damage existing animal habitat, vegetation, water quality (including groundwater) or air quality. *The requested facility will not damage or generate adverse impact on any animal habitat, vegetation, and water or air quality.*
- (I) Whether the proposed special exception at the specified location will contribute to or promote the welfare or convenience of the public. *The proposed special exception at this location will contribute to and promote the welfare and convenience of the public. The requested facility will improve area wireless coverage for essential, non-essential and emergency communications. Additionally, quality wireless service offers support to a viable economy.*
- (J) Whether the traffic expected to be generated by the proposed use will be adequately and safely served by roads, pedestrian connections and other transportation services. *The proposed use will be an unmanned facility; therefore, the traffic patterns will not be adversely affected. Once the facility is constructed, normal traffic to the site will include approximately one visit per month by a service technician for regular maintenance.*
- (K) Whether, in the case of existing structures proposed to be converted to uses requiring a special exception, the structures meet all code requirements of Loudoun County. *T-Mobile requests a special exception approval to allow the proposed antennas to be located on a building/structure less than 40 feet height. Such special exception may be modified in accordance with the provisions of Section 6-1300.*
- (L) Whether the proposed special exception will be served adequately by essential public facilities and services. *The proposed use will not generate demand for*

essential public facilities and services as it is an unmanned facility, not intended for human habitation.

- (M) The effect of the proposed special exception on groundwater supply. *The proposed special exception will have no effect on the groundwater supply.*
- (N) Whether the proposed use will affect the structural capacity of the soils. *The facility will have no effect on the structural capacity of the soil.*
- (O) Whether the proposed use will negatively impact orderly and safe road development and transportation. *The proposed use will have no impact on orderly and safe road development and transportation. Once the facility is constructed, normal traffic will include approximately one visit per month by a service technician for regular maintenance.*
- (P) Whether the proposed special exception use will provide desirable employment and enlarge the tax base by encouraging economic development activities consistent with the Comprehensive Plan. *The proposed special exception may generate jobs during the construction phase as well as ongoing employment for maintenance of the facility. By providing wireless telecommunications service in the area, the proposed special exception can advance competition while promoting communications which is essential for business growth and development.*
- (Q) Whether the proposed special exception considers the needs of agriculture, industry, and businesses in future growth. *The proposed special exception does consider these needs and can help to advance future growth in these areas. Communications is essential for future growth and development of agriculture, industry and business. The requested special exception can directly impact those needs by providing a high quality, reliable communications service.*
- (R) Whether adequate on and off-site infrastructure is available. *Adequate on and off site infrastructure is available for the successful integration of the requested facility into the T-Mobile wireless telecommunications network.*
- (S) Any anticipated odors which may be generated by the uses on site, and which may negatively impact adjacent uses. *The proposed use will not generate any odor.*
- (T) Whether the proposed special exception uses sufficient measure to mitigate the impact of construction traffic on existing neighborhoods and school areas. *The proposed construction will take place on site. An existing parking lot extends onto the property. There is no expected impact to neighborhoods, school areas or regular traffic flow to be caused by construction traffic.*

RE: SPMI 2010-0012, CMPT 2008-0016, T-Mobile at Baha'i Center
T-Mobile Northeast LLC
Site WAN463
21415 Cardinal Glen Circle, Sterling, VA 20164

Dear Ms. McCarter:

T-Mobile Northeast LLC (T-Mobile) acknowledges receipt of various referral comments in the referenced commission permit application. This letter constitutes the response of T-Mobile as applicant to all comments received to date in connection with this application. Where the issue has been resolved we so state, and where applicable the revisions are also depicted on the enclosed revised Plat Sheets.

Our responses to the various referrals and issues are as follows:

DEPARTMENT OF PLANNING REFERRAL 4/20/10 (Pat Giglio, Planner, Community Planning)

Staff Comment: Staff finds that the proposed antenna concealment canisters will be a prominent feature on the building and may detract from the overall visual quality of the building. Staff requests additional information and photo-simulations to further evaluate the visual impact of the proposed antennas and their ability blend with the architecture of the building and surrounding built environment.

Response: T-Mobile submits that concealment canisters will not be a prominent feature on the existing rooftop and will blend well with the surrounding residential neighborhood. Contrary to the Background Statement in this referral memo, the proposed structure will not be elevated 10 feet above the parapet wall. The revised design will only be elevated 6-1/2 feet over the 38-1/2 foot parapet wall, with a top height of 45 feet. In addition, the canister will be constructed of a radio-frequency friendly fiberglass material and painted light gray to match the existing rooftop and blend into the skyline. T-Mobile conducted a survey of similar rooftops with visibility from surrounding residential neighborhoods around Route 7. The photographs attached as Attachment A demonstrate that there a variety of equipment mounted to area rooftops, including sleds, and that canister shaped smokestacks are a common feature in many of the residential communities

and on residential homes (See Attachment A). In addition, T-Mobile conducted another visual impact survey which included another balloon test and assessed the visual impact from surrounding locations. The photographs were then modified to include scaled photographs of the proposed canisters so that these new “photosimulations” can highlight the actual visual impact to be expected from T-Mobile’s proposal. The revised photo simulations are attached to this document as Attachment B.

DEPARTMENT OF BUILDING AND DEVELOPMENT, ZONING ADMINISTRATION
REFERRAL 04/23/2010 (Val Thomas, Planner, Zoning Administration)

I. Conformance with Section 5-618 – Telecommunications Use And/Or Structures

Pursuant to Section 5-618(A)(1) of the Ordinance, antennas and related unmanned equipment are permitted on an existing telecommunications monopole, telecommunications tower, or structure 40 feet or greater in all zoning districts subject to the performance standards outlined in this section. The applicant is proposing to locate antennas on the Baha’i Center which is 35 feet in height and therefore only permitted with the grant of a minor special exception permit. Consequently, the Applicant has submitted a minor special exception application concurrent with the Commission Permit application to allow the proposed antennas to be located on a building less than 40 feet high. Please label the plat as a Special Exception Plat (Minor) and denote the limits of the special exception on the plat.

RESPONSE: The Plat has been modified to add the requested title and to denote the limits of the special exception area.

II. Conformance with Section 6-1310 – Issues for Consideration for all Special Exception Uses

Section 6-1310 includes factors that shall be given reasonable consideration in considering a special exception or minor special exception application, for which the applicant is required to address in its Statement of Justification or special exception plat, if applicable. Staff offers the following comment:

- (A) *Whether the proposed special exception is consistent with the Comprehensive Plan.*
Zoning defers to Comprehensive Planning for determining consistency with the Comprehensive Plan.

RESPONSE: See responses to Department of Planning Comments above.

III. Other Comments:

- (1) Section 6-1313 - The Applicant and the Board should be aware that Section 6-1313(A) of the Ordinance requires that “unless a longer period of validity is specifically approved as part of such application, no special exception permit shall be valid for a period longer than five (5) years from the date on which the special

exception was granted, unless within such five (5) year period: (1) a building permit is obtained and the erection or alteration of a structure is started and diligently pursued, and (2) an occupancy permit is obtained and a use commenced." The Ordinance also permits the period of validity to be extended for good cause shown, by application to the body that approved the special exception.

In addition, Section 6-1313(B) states that "as a condition of approval, a special exception permit may be granted for a specific period of time less than five (5) years with expiration of the approval to occur at the termination of said period." The Ordinance permits an extension to be granted "prior to expiration by the original body, upon written application, without notice or hearing. After expiration, no extension may be granted without complying with the requirements for an initial application for a special exception."

RESPONSE: T-Mobile acknowledges.

- (2) On the Plat, it appears that the equipment area is 180 square feet, while the equipment cabinets are smaller. Staff recommends that the Applicant indicate the size of the equipment cabinets.

RESPONSE: Equipment specifications have been added to the Plat.

Please contact me if you have any questions with reference to this submission at Amy.Bird3@T-Mobile.com or (410) 703-6541.

Kind Regards,

Amy Bird
Senior Zoning Manager
T-Mobile Northeast LLC

RE: CMPT 2008-0016, T-Mobile at Baha'i Center
T-Mobile Northeast LLC
Site WAN463
21415 Cardinal Glen Circle, Sterling, VA 20164

Dear Ms. McCarter:

T-Mobile Northeast LLC (T-Mobile) acknowledges receipt of various referral comments in the referenced commission permit application. This letter constitutes the response of T-Mobile as applicant to all comments received to date in connection with this application. Where the issue has been resolved we so state, and where applicable the revisions are also depicted on the enclosed revised Plat Sheets.

Our responses to the various referrals and issues are as follows:

DEPARTMENT OF PLANNING REFERRAL 3/4/2009 (Pat Giglio, Planner, Community Planning)

Staff Comment: *The application proposes the installation of telecommunication equipment on the roof of the Baha'i Center, an existing tall structure, in accordance with Plan policy, however an existing building with roof top telecommunication facilities, Old Dominion University Building at Mirror Ridge, is located in close proximity to the subject site. Staff requests that the applicant provide additional information to demonstrate that collocation on the roof of the Old Dominion University Building at Mirror Ridge is not feasible in order to control the proliferation of telecommunication sites and to mitigate the visual impact of the proposed facility on the surrounding area. If collocation is not possible, the following issues should be addressed.*

Response: T-Mobile currently has equipment on the rooftop of the Old Dominion University Building and it does not require adequate coverage for the desired search area.

Staff Comment: *Staff finds that the proposed antennas will be a prominent feature on the building and will detract from the overall visual quality of the building as well as create a*

negative visual impact on the surrounding residential areas. Staff recommends that the applicant consider a flush-mount or other stealth design to better blend the appearance of the proposed antennas with the architecture of the building and to mitigate the visual impact on the surrounding area.

Response: T-Mobile has re-designed the facility as a canister design. The antennas will be mounted within the stealth canister, which will blend in better with the existing architecture and building, thereby mitigating the visual impact.

Staff Comment: *Staff recommends that the applicant commit to removal of the telecommunication equipment following cessation of use by including notes on the submitted plats.*

Response: T-Mobile has consents to cessation of use and has committed to removal on the revised plat.

DEPARTMENT OF BUILDING AND DEVELOPMENT, ZONING ADMINISTRATION
REFERRAL 03/03/2009 (Val Thomas, Planner, Zoning Administration)

2. Pursuant to Section 5-618 (A)(1) antennas and related unmanned equipment are permitted on an existing telecommunications monopole, telecommunications tower, or structure forty (40) feet or greater in height in all zoning districts subject to the performance standards outlined in that section. The height of the existing building on the property is 35 feet, which is also the maximum height permitted in the R-4 zoning district. Therefore, as currently proposed the antennas cannot be located on the rooftop of the building as it does not meet the zoning regulation in section 5-618(A)(1).

Staff recommends that the Applicant submit a request for a minor special exception approval to allow the proposed antennas to be located on a building/structure less than 40 feet height. Such special exception may be modified in accordance with the provisions of Section 6-1300. Please note that modifications may be approved by the Board of Supervisors upon a finding that such modification to the regulations will achieve an innovative design, improve upon the existing regulations, preserve the County's historic or archeological heritage, or otherwise exceed the public purpose of the existing regulation.

Response: T-Mobile submits the attached application for a minor special exception.

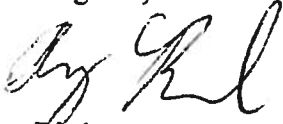

3. Directional or panel antennas cannot exceed ten feet in height per Section 5-618(A)(5). Page 4 of the Statement of Justification ("SOJ") notes five feet. Please correct this.

Response: The corrected height is included in the special exception SOJ.

..T..Mobile..

Please contact me if you have any questions with reference to this submission at Amy.Bird3@T-Mobile.com or (410) 703-6541.

Kind Regards,

Amy Bird

4. ADDITIONAL INFORMATION

a. One of the following options must be checked:

☐ In addition to the names listed in paragraphs C. 1, 2, and 3 above, the following is a listing of any and all other individuals who own in the aggregate (directly as a shareholder, partner, or beneficiary of a trust) 10% or more of the APPLICANT, TITLE OWNER, CONTRACT PURCHASER, or LESSEE of the land:

☒ Other than the names listed in C. 1, 2 and 3 above, no individual owns in the aggregate (directly as a shareholder, partner, or beneficiary of a trust) 10% or more of the APPLICANT, TITLE OWNER, CONTRACT PURCHASER, or LESSEE of the land:

Check if applicable:

☐ Additional information attached. See Attachment to Paragraph C-4(a).

b. That no member of the Loudoun County Board of Supervisors, Planning Commission, Board of Zoning Appeals or any member of his or her immediate household owns or has any financial interest in the subject land either individually, by ownership of stock in a corporation owning such land, or through an interest in a partnership owning such land, or as beneficiary of a trust owning such land.

EXCEPT AS FOLLOWS: (If none, so state).

Check if applicable:

☐ Additional information attached. See Attachment to Paragraph C-4(b).

c. That within the twelve-month period prior to the public hearing for this application, no member of the Loudoun County Board of Supervisors, Board of Zoning Appeals, or Planning Commission or any member of his immediate household, either individually, or by way of partnership in which any of them is a partner, employee, agent or attorney, or through a partner of any of them, or through a corporation (as defined in the Instructions at Paragraph B.3) in which any of them is an officer, director, employee, agent or attorney or holds 10% or more of the outstanding bonds or shares of stock of a particular class, has or has had any business or financial relationship (other than any ordinary customer or depositor relationship with a retail establishment, public utility, or bank), including receipt of any gift or donation having a value of \$100 or more, singularly or in the aggregate, with or from any of those persons or entities listed above.

EXCEPT AS FOLLOWS: (If none, so state).

Check if applicable:

☐ Additional information attached. See Attachment to Paragraph C-4(c).

4. ADDITIONAL INFORMATION

a. One of the following options **must** be checked:

☐ In addition to the names listed in paragraphs C. 1, 2, and 3 above, the following is a listing of any and all other individuals who own in the aggregate (directly as a shareholder, partner, or beneficiary of a trust) 10% or more of the APPLICANT, TITLE OWNER, CONTRACT PURCHASER, or LESSEE of the land:

☒ Other than the names listed in C. 1, 2 and 3 above, no individual owns in the aggregate (directly as a shareholder, partner, or beneficiary of a trust) 10% or more of the APPLICANT, TITLE OWNER, CONTRACT PURCHASER, or LESSEE of the land:

Check if applicable:

☐ Additional information attached. See Attachment to Paragraph C-4(a).

b. That no member of the Loudoun County Board of Supervisors, Planning Commission, Board of Zoning Appeals or any member of his or her immediate household owns or has any financial interest in the subject land either individually, by ownership of stock in a corporation owning such land, or though an interest in a partnership owning such land, or as beneficiary of a trust owning such land.

EXCEPT AS FOLLOWS: (If none, so state).

Check if applicable:

☐ Additional information attached. See Attachment to Paragraph C-4(b).

c. That within the twelve-month period prior to the public hearing for this application, no member of the Loudoun County Board of Supervisors, Board of Zoning Appeals, or Planning Commission or any member of his immediate household, either individually, or by way of partnership in which any of them is a partner, employee, agent or attorney, or through a partner of any of them, or through a corporation (as defined in the Instructions at Paragraph B.3) in which any of them is an officer, director, employee, agent or attorney or holds 10% or more of the outstanding bonds or shares of stock of a particular class, has or has had any business or financial relationship (other than any ordinary customer or depositor relationship with a retail establishment, public utility, or bank), including receipt of any gift or donation having a value of \$100 or more, singularly or in the aggregate, with or from any of those persons or entities listed above.

EXCEPT AS FOLLOWS: (If none, so state).

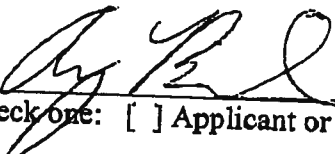

Check if applicable:

☐ Additional information attached. See Attachment to Paragraph C-4(c).

D. COMPLETENESS

That the information contained in this affidavit is complete, that all partnerships, corporations (as defined in Instructions, Paragraph B.3), and trusts owning 10% or more of the APPLICANT, TITLE OWNER, CONTRACT PURCHASER, OR LESSEE of the land have been listed and broken down, and that prior to each hearing on this matter, I will reexamine this affidavit and provide any changed or supplemental information, including any gifts or business or financial relationships of the type described in Section C above, that arise or occur on or after the date of this Application.

WITNESS the following signature:
